PHILADELPHIA, WEDNESDAY, JANUARY 3, 1906.

\$5.00 PER YEAR.

ARCHITECTS' NOTES

Charles L. Hofmann, architect, 914 Walnut street, is now ready for sub-bids for the tile work and the combination gas and electric fixtures for the handsome new residence now in the course of erection at Ocean City, N. J., for Thomas C. McCahan, of this city.

The Y. M. C. A. building at the southeast corner of Fifteenth and Chestnut streets has been sold to Mr. Geo. B. Wilson, for the sum of \$1,050,000. The above named gentleman purchased the Pennsylvania Building some time ago. The trustees have purchased the properties from 1417 to 1423 Arch street and upon this site will erect a handsome new ten-story home, all modern equipments and will be one of the handsomest in the state. The new lot measures 98x188 feet, giving them five thousand more square feet than their present quarters. It is the intention of the Association to move to their new quarters in the Spring of 1907, or not later than Fall of the same year. It has not been decided as yet if architects will be invited to prepare plans in competition, as such was the case in all buildings erected for this Association. Further details later.

Stearns & Castor, architects, Stephen Girard Building, have started work on plans and specifications for a handsome new edifice to cost \$25,000 for the congregation of the Epworth Methodist Episcopal Church to be built on Fifth and Chestnut streets, Columbia, Pa. It will be built of stone and have a seating capacity of about 600 persons. They will invite bids in a short while for the new residence for William B. Mann, Jr., to be erected at Oak Lane, Philadelphia. Details previously noted.

Isaac Pursell, architect, 110 South Fourth street, has been commissioned to prepare plans and specifications for a handsome new edifice to be built at Knoxville, Tenn., for the Second Presbyterian congregation of that place. It will be built of stone with slate roof and have the usual church furnishings, such as steam heat, wired for electricity, pews, etc.

Andrew J. Sauer, architect, has moved from 1208 Chestnut street to 931 Chestnut street, occupying offices with Albert Kelsey, architect. He also announces that he is working on plans and specifications for a new synagogue for the Beth Israel congregation to be built at Thirty-second and Montgomery avenue. It will be one-story high, built of stone and contain the lecture hall and class rooms. The balance of the building will be built later. Be ready for bids about February 1st.

Baker & Dallett, architects, 1420 Chest-

nut street, have completed plans and specifications and invited estimates for a sanitarium to be erected at Edge Hill, Pa., for Mr. S. C. Wolf. There will be two buildings and they will measure over all 115x200 feet. They will be constructed of frame and contain fifty rooms with all modern improvements and appointments. Bids due January 4th. The following have been invited to bid: F. L. Hoover & Sons, Inc.; J. P. Thompson, Mitchell Bros. John Kauffie and M. E. Hansler.

Duhring, Okie & Ziegler, architects, South Penn Square Building, are working on plans and specifications for a new summer cottage to be erected at Wildwood Crest, N. J. It will be two and a half stories high, brick and shingle, will have porch fronts and all modern conveniences and appointments. Will be ready for bids in about two weeks' time.

A plot of ground has been donated to the Chestnut Hill Hospital. It is situated at the corner of Gravers' Lane and Crefeldt streets, Chestnut Hill, and measures 100x120 feet and has been conveyed to the trustees of the hospital. Adjoining the plot is the old Union Burying Ground. This measures 60x120 feet. The surviving trustees have agreed to also present this ground to the hospital. There is a stipulation that when the hospital wishes to build there the bodies must first be removed. It is expected that bids will be invited and work started on the new building that will be erected at Graver's Lane and Crefeldt street. It is understood that plans and specifications having been prepared for their erection the architect's name and further particulars will be given later.

Barnes, architect and engineer, 901 Walnut street.

As it has been the custom for years the Masters' Builders Exchange wound up the old year with a luncheon and musical vaudeville and smoker at the Exchange, 18 to 24 South Seventh street, on last Saturday afternoon, December 30th. Previous to the entertainment a luncheon was served in the banquet hall on the fourth floor and it was followed by the musical and vaudeville and smoker in the exchange rooms on the second floor. As all the talent was professional it was very much enjoyed by the large number of members and their friends present.

A NEW ARCHITECTURE

In Europe as well as in the United States the minds of the professional architects are directed towards the evolution of a new order of architecture. There is a good deal of attention being directed at present to the movement which is represented in Germany by the modern Kunst (New Art) and in France by L'Art Nouveau, whereby an attempt has been made to create a new style of architecture. The canons as laid down by the School of L'Art Nouveau are interesting. First among them is the deliberate intention to avoid all the styles of the past and make no rehashing of old models. Originally, be it ever so poor, is a prime requisite. The theme of this originality forms the second point in the study and adaptation of natural forms, as the artist sees them and interprets them himself. This is the origin of the delightful curves that characterize the work and the harmonious color schemes which are drawn direct from nature. A third condition laid down is reality of material with no imitation of one material with another. Beauty in the original material is also necessary. Together with this comes the revival of disused arts and the discovery of artistic possibilities in commonplace things. The most cheerful condition of the whole movement, perhaps, is the spirit of vigor and boldness with which the subject is attacked, for in all reality Modern Art is an attack on all the ancient schools of design and as such is deeply resented by many.

ARCHITECTS' NOTES

Pugh & Hubbard, architects and engineers, Real Estate Building, are ready for material prices on the construction of the Interurban Electric Railroad between Mansfield & Wooster, Ohio. It will be 42 miles long. Power houses will be built and other necessary material will be required for the equipment of this road.

BUILDING and REAL ESTATE NOTES

By the will of the late Benjamin F. Teller, the sum of \$50,000 has been left to the Rodeph Shalom Synagogue, the money to be used for the erection of new buildings.

Wm. R. Dougherty, builder, 1604 Sansom street, has been awarded the contract to build the new stable at Merion, Pa., for Alexander Simpson. It will be two stories high, built of brick and stone. Plans by Walter D. Price, architect, 731 Walnut street.

The Rapid Transit Company has completed negotiations with the Philadelphia and West Chester Traction Company for extensive terminal facilities at the intersection of Sixty-fifth and Market streets. As a result, the Rapid Transit people will erect a joint passenger station that will cost \$100,000, and the Philadelphia and West Chester Traction Company will erect a train-shed west of the station that will cost about \$50,000. Also, the Philadelphia and Western Railroad, which is building a line from Sixty-third and Market streets to Wayne and Parkersburg, Pa., will also use this new station. The plans for the station have been prepared under the direction of Chief Engineer Twining. The station will be so constructed that the three railroads named will be able to have joint waiting rooms.

1905 COMPLETE

Our Regular Annual Report for 1905 of Construction Work, including the full Records of Transfers of Real Estate.

9880 New Buildings of All Kinds Costing \$29,506,138.00 exclusive of the cost of the land, a gain over 1904 of 2582 in the number of new buildings and a gain in the amount invested of \$5,720,370.00.

2409 Alterations and Additions (Costing \$300 and over) costing \$3,613,500.00 against 2244 in 1904 costing \$3,366,000.00, a gain for 1905 of 165 in number and an increase in the expenditure of \$247,500.00.

Total Expenditure for Building Improvements during 1905 was \$33,119,638.00, against \$27,151,768.00 in 1904 a gain of \$5,967,870.00.

21,403 Transfers of Real Estate during 1905, Representing \$109,008,102.02 in value, while there were 19,480 in 1904, with an aggregate value of \$97,046,364.50, a gain of \$11,961,737.52.

Our readers who closely follow our reports will recollect that we predicted in the early part of 1904 that the transfers of real estate for that year would reach one hundred millions in value. While we missed the mark in that year by less than three millions, we did not feel in the least disgraced for the handsome results assured us that the one hundred million mark was close at hand and that it would be reached in 1905.

A gain in this direction of over \$11,000,000 places 1905 as the banner year in the transfers of real estate in the history of the city, so far as our own information extends, and we would be delighted if any of our readers should furnish us with data proving the contrary, as our own records show that previous to 1904, since 1888, 1903 with \$96,372,879.84 was the largest.

As a matter of history, 1905 discounts any previous year in the construction of our ever popular two-story dwellings since the city was founded, and it is to be regretted that it is not possible to follow the yearly growth of this class of buildings since the beginning.

If an outsider, unfamiliar with our American idea of home life were told that our two-story dwellings built last year would comfortably provide for 41,215 persons, he would be astounded, but such is the fact, notwithstanding.

We give our table of the yearly two-story dwelling

construction as well as the three and four story dwellings since 1887, inclusive.

	Two-story Dwellings	Three-story Dwellings	Four-story Dwellings	Total
1887.....	4569	1659	3	6231

1905.....	8243	974	107	9324
	92,281	26,828	504	119,613

Hence in nineteen years there were erected in this city 119,613 dwellings (including stores and dwellings) or a yearly average of over 6,295, which is certainly far beyond that of any other city on the globe.

The total of industrials for 1905 show two less than in 1904 but the investment is greater by \$3,751.00. The following table shows the yearly construction of industrial buildings since 1889, inclusive:

DEAR SIR: I WILL CONTRACT to heat your residence, however large or small, with HOT WATER, and file a Trust Company's bond for ten times the cost, the same to be forfeited if I fail in any direction.

This means that there shall be more than enough radiation at the smallest possible cost for coal. No leaks, no mistakes, no annoyances of any kind. The boiler to be of the best make.

The responsibility all mine, and the cost no greater because of good work and material.

Yours truly,

NATIONAL CONSTRUCTION AND FINANCE CORPORATION

The National Construction and Finance Corporation, Suite, 702-03-04 and 1117-1118 Witherspoon Building, has been organized with a capital of \$250,000, as the successor to the real estate and financial firm of Lutes and Lutes.

It is the purpose of the new organization to buy and sell real estate, and to finance building operations, and loan money on bond and mortgage, and also make contracts for the construction of all kinds of buildings, with a proper supervision of the work, and in fact to enter into all branches of business involving the ramifications of real estate. Its capital will enable the company to do a great deal of this business through its own resources, besides which it will represent a centralizing influence in guiding and directing, as well as investing the capital of investors. The opportunity for such a business in this city and vicinity in the hands of capable and experienced people can well be understood. This concern will also represent a number of leading fire, accident, and burglary insurance companies. The officers of the Corporation are E. S. Lutes, president; R. G. Gettell, vice-president and treasurer, and L. C. Lutes, secretary. We wish them every success.

THE AETNA INSURANCE CO.

The statement of the Aetna Insurance Co., of Hartford, Conn., of which Messrs. Durban & Co., 403 Walnut street, are the agents, make a most remarkable showing.

With a capital of \$4,000,000 its assets amount to \$16,815,296.87 or over four times its capital. Its surplus as to policy holders amounts to \$11,036,010.93. Its reserve for re-insurance amounts to \$5,016,894.42, while the unpaid loss account amounts to only \$444,779.65 and other claims amount to \$317,611.87. This leaves a net surplus of \$7,036,010.93.

These are certainly heavy figures for our readers to digest, as they indicate the wonderful growth and prosperity of at least one of our many progressive American Fire Insurance Companies.

The Harrisburg, Pa., Board of Trade Journal, which is devoted to the manufacturing and mercantile interests of a Greater Harrisburg has sent us its initial number, which fully establishes the important fact that the new enterprise in newspaperdom is in the hands of capable and energetic people.

ARCHITECTS' NOTES.

It is reported that Harrison C. Rea, of 3440 North Broad street, will erect a new residence on his property near Kirkland Station on the Frazier Branch of the P. W. & B. Railroad.

Mrs. William Logan Fox, of 2009 Pine street, has commissioned the firm of Newman & Harris, architects, Land Title Building, to prepare plans and specifications to govern the erection of her handsome Colonial residence to be built on the Sommerville property at the southeast corner of Tenth and Clinton streets, recently secured by her. Further particulars later.

Wilson, Harris & Richards, architects and engineers, Drexel Building, are working on plans for a handsome new residence to be erected at Wynne, Pa., for Fletcher Pierson, Esq. It will be three stories high, 45x60 feet and be constructed of stone, and frame. It will have porches, porte cochere, hardwood, tile, baths, wired for electricity and all modern improvements.

In our recent issue of February 28th, we published the fact that the book called "House Hints" could be procured at the office of C. E. Schermerhorn, architect, 430 Walnut street, for 50 cents a copy. This is a mistake. This book is published by the "House Hints Publishing Co., of Phila." and is for sale at the news stands. Mr. Schermerhorn compiled the book for this company and is in no way connected with it.

Rowland W. Boyle, architect, 1626 Chestnut street, has completed plans and specifications for interior remodeling and new stone front, fire escapes, etc., to the Parochial School of St. Ann Roman Catholic congregation, situated at Tucker and Memphis streets. Bids due March 9th. The following have been invited to bid: John McShane, Wm. McShane, John Gordon, James Gordon, National Finance Company and Edward O'Day.

Bailey & Bassett, architects, 421 Chestnut street, have completed plans and specifications and invited estimates for a house and stable to be erected at Haverford, Pa., for Walter P. Pharo, Esq. The house will be three stories high, 34x42 feet, with a kitchen wing, 20x38 feet. It will be of brick and stone with shingle roof, porch front, all up-to-date improvements. The stable will be built of the same material and be two stories high.

Also the building of a large Sunday-school building adjoining the church. It will be two stories high and gallery, 60x20 feet, and be built of stone, and

will accommodate 1200 people. It will be wired for electricity and have all the up-to-date improvements. There will also be a new heating plant installed and general renovating of the church. Working drawings will be ready for bids in a short while.

George W. Bower & Sons, architects, Trust Company Building, Morristown, N. J., have prepared plans for alterations and additions to a frame dwelling for A. H. Lynch. There will be required tin and shingle roofs, concrete floors, hardwood finish, porch columns. Cost about \$2,000. They are also preparing plans (which are nearly complete) for a store and flat building, size 40x80 feet, and three stories high, for E. H. Tomlinson. To be built of concrete blocks and columns, metal ceilings, cornices and sky lights, mosaic tiling, plate glass, mantels, baths, water-closets, etc., and steam heating. Cost about \$15,000.

The lecturer and guest of the evening will be Mr. Henry C. Mercer, of the Moravian Pottery and Tile Works, Doylestown, Pa. The executive committee of the club announces programme in the third competition for the Walter Cope Memorial Prize. Drawing must be directed to the secretary and delivered at the club rooms not later than April 4, 1906, at noon. It will be two stories high, built of stone with Sunday school on first floor and auditorium on the second floor. It will have stained glass windows, heated by steam and all the usual appointments. Thomas & Co., builders, of Baltimore, Md., for the amusement buildings and store building for the Nixon Amusement and Realty Company to be built on the southeast side of Arkansas av., facing the Boardwalk, Atlantic City, N. J. The building will be 110 feet high and be five stories in height, measuring 207x298 feet. On each side of this structure will be a music hall and theatre, accommodating 3500 and 2200 people each. On the roof will be a roof garden. It will be constructed of brick and stone and will be fire-proof. The theatres will be handsomely finished on the interior with every modern convenience and comfort and safety for the audience. This structure is estimated to cost \$1,000,000 and be one of the finest buildings of its kind on the coast. It is to be ready for use by about July 1st of this year.

Ballinger & Perrot, architects and engineers, 1700 Chestnut street, have been commissioned to prepare drawings and specifications, and will invite estimates in about one week for a new parochial school building and sisters' house for St. Stanislaus Roman Catholic Church, S. ARCHITECTURAL TERRA COTTA

Since the Bronx and Heights booms of 1904-5 there has been a new influx of speculative tenement house builders in these two sections of New York city. People who speculated in lots there and were the last to buy, not being able to dispose of their holdings in vacant property at a profit, were compelled to improve.

The result is that a number of wealthy people, who acquired surplus capital in their various other lines of enterprise, are now in the speculative tenement house building business, giving that line a new and altogether different aspect.

So large is the number of this new class, that together with the responsible builders in this line of former years, they constitute a very large and desirable set of people to do business with, giving the supply houses a good chance to discriminate against the few cheats that might have been left over from former years and crowd them out of the business—a thing which has almost already been accomplished.

Some of the better class of manufacturers of architectural terra cotta are still under the impression of "past events" and consequently give this line—otherwise a quite profitable one—a wide berth, with the result that others, who are in closer proximity to the field of operations and who look with open eyes on "present events" reap the benefits. These latter are actually swamped with orders in this line, so much so, that quite a number of operations of various magnitude in this line have suffered considerably, owing to delays in the supply of terra cotta far beyond the time stipulated in the contracts.

Would it not be advisable for all terra cotta manufacturers to look into this matter a little more closely? The writer, an experienced terra cotta salesman, a former builder and enjoying the confidence of a number of this class of builders, desires to communicate with some of the above firms with the view of placing a goodly share of this trade.

ARCHITECTS' NOTES.

Heacock & Hokanson, architects, have moved from 931 Chestnut street to Bailey Building, 1224 Chestnut street. Rooms 905 and 906.

Churchman & Thomas, architects, southeast corner of Sixth and Walnut streets, are working on plans and specifications for alterations and additions to the First National Bank at Main near Cherry street, Norristown, Pa.

Isaac Pursell, architect, 119 South Fourth st., has completed plans and invited John W. Emory, builder, 1524 Sansom street, to submit bid for the new church and house, to be built at Knoxville, Tenn., for the Second Presbyterian Church of that place. They will be built of Tennessee stone. The church will be one-story high, 95x125 feet, and the house two and a half stories high, 24x76 feet.

At Morristown, N. J., Architect Geo. W. Bower & Son, Morristown, N. J., have prepared plans for remodeling and erecting a row of stores and flats on Speedwell avenue for Salby Brothers, at a cost of \$15,000. The size will be 96x52 feet, of frame, gravel roof, metal ceilings, metal cornices and skylights, metal covering for outside, plate and sheet glass, gas, water closet fixtures, stationary tubs, sinks, etc.

Frank H. Keisker, architect, Perry Building, has completed plans and specifications, and invited estimates for alterations and additions to the residence at Fifty-eighth street and Elmwood avenue. PHILADELPHIA, WED'Y, APRIL 18, 1906

Every mechanical craft in the building line wants an increase of wages and it is stated that plasterers will demand \$5.00 per day. It is also stated that May 1st is the time set for the demand to be made.

The present price of building material in conjunction with the proposed demand of the mechanical trades, if it takes place, will surely mean the death of the goose that has been laying golden eggs, without a parallel in the history of the country.

Indeed, the lines have already been drawn so tight in the direction of building that it is truly phenomenal that so much has been done. It is nonsense to suppose that contemplated work of a heavy and costly character will not suffer as a result of further labor exactions.
